MealSwipe: Team Weekly Report (Week 6)

Status Report

Write a one-third to one-half page status report describing the team's overall progress and challenges faced last week. Also discuss the team's goals and plan for this week.

This week marks the hallmark of our sprint 1. So far the overall progress of the team has been satisfactory. We have a solidified tech stack with a dataset we are able to parse and present on our website. In addition, we have started tasks including building a restaurant filter, forming data into Tinder-style cards, and creating a favorite restaurant list. We have completed the mockup API and UI designs, which indicates the team is on track to complete most essential tasks for sprint 1. At this early stage of development, it can be challenging to build features from scratch, but as we continue to commit changes, it becomes slightly easier to build off of each others' work. Our goals for this week include completing developing the card view, finish the CI/CD pipeline, finishing the restaurant filter, and finishing the favorites list. By the end of this week, we will have completed the first sprint, and we hope to have a basic app with rudimentary functionality, albeit no complex backend.

Current Status

1. What did the team work on this past week?

Task	Task Lead	Status	Notes
Restaurant filter	Henry Chibib	In progress ⌄	Started developing, was unable to display

			results
Google Places API Mockup	David Rodrigue…	Done ▾	Fully deployed in AWS
Getting api call data into cards	Sanjay Sugumar	In progress ▾	Working on parsing the raw json into a custom restaurant struct
Creating favorite restaurants list	Jacob Miller	In progress ▾	Currently in progress
Created front-end drafts on how MealSwipe's multiple views should look like..	Sanjay Sugumar	Done ▾	Sanajay's friend thankfully helped us designing these. These will also be presented in Taele's meeting.

2. What feedback has the team received?

From Whom	Feedback	Next Steps
Dr. Taele	Would like fleshed-out UI designs in order to better understand the plan and goals.	We now have designs for several screens/views.
Tolga Yildiz	Focus on CI/CD deployment	Complete CI/CD deployment

3. Are any resources needed? If so, what?

Plans for Next Week

What are your plans for this next week?

Task	Task Lead	Notes
Get the restaurants into a stack of cards	Sanjay Sugumar	
Finish CI/CD Pipeline for Deployment	David Rodriguez Sanchez	Using GH Actions and AWS we will deploy both back-end and front-end.
Finish restaurant filter	Henry Chibib	will continue to work on filtering restaurants using an

		interactive tool.
Finish favorites filter	Jacob Miller
